## **NEW AMERICANS IN CALIFORNIA: The Economic Power of Immigrants, Latinos, and Asians in the Golden State**

California has been a major “gateway” for immigrants to this country since it became a state in 1848 and is home to the largest numbers of immigrants, Latinos, and Asians in the country. As a result, California exemplifies the enormous political and economic clout of immigrants and accounts for innumerable stories of immigrant success in climbing the socioeconomic ladder over time. Today, more than 1 in 4 Californians is an immigrant (foreign-born), and more than half of Californians are Latino or Asian. Immigrants and their adult children account for roughly 1 in 4 of the state’s registered voters. Latino and Asian entrepreneurs (both foreign-born and native-born) own more than one-quarter of all businesses in the state, while Latino and Asian consumers account for nearly one-third of the state’s total purchasing power. Latino immigrants in California experience pronounced upward mobility over time in terms of mastering English and owning their own homes. And most native born Californians have experienced wage *gains* from the presence of immigrants in the state’s labor market. These hardworking Californians have formed the backbone of the California economy throughout the state’s history, and they will be a key ingredient to California’s economic rebound.

### ***More than one quarter of Californians are immigrants.***

- **The foreign-born share** of California’s population rose from 21.7% in [1990](#),<sup>1</sup> to 26.2% in [2000](#),<sup>2</sup> to 27.2% in [2010](#),<sup>3</sup> according to the U.S. Census Bureau. California was home to 10.2 million immigrants in [2010](#),<sup>4</sup> which is greater than the total population of [Michigan](#).<sup>5</sup>
- **45.6% of immigrants (or 4.6 million people) in California were naturalized U.S. citizens** in [2010](#)<sup>6</sup> (up from 31.2% in [1990](#)<sup>7</sup>)—meaning that they are eligible to vote.
- **28.9% (or 4.3 million) of all registered voters in California are “New Americans”**—naturalized citizens or the U.S.-born children of immigrants who were raised during the current era of large-scale immigration from Latin America and Asia which began in 1965—according to an analysis of 2008 Census Bureau data by [Rob Paral & Associates](#).<sup>8</sup>

### ***More than half of Californians are Latino or Asian—and they vote.***

- **The Latino share of California’s population** grew from 25.8% in [1990](#),<sup>9</sup> to 32.4% in [2000](#),<sup>10</sup> to 37.7% (or 14.1 million people) in [2010](#).<sup>11</sup> **The Asian share of the population** grew from 9.2% in [1990](#),<sup>12</sup> to 10.9% in [2000](#),<sup>13</sup> to 13.1% (or 4.9 million people) in [2010](#),<sup>14</sup> according to the U.S. Census Bureau.
- **Latinos comprised 21.4% (or 3 million) of California voters in the 2008 elections, and Asians 9.7% (or 1.3 million)**, according to the [U.S. Census Bureau](#).<sup>15</sup> The number of Latino and Asian voters is one million more than the margin of victory ([3.3 million votes](#)) by which Barack Obama defeated John McCain.<sup>16</sup>

- In California, **90.4% of children with immigrant parents were U.S. citizens** in [2009](#), according to data from the Urban Institute.<sup>17</sup>
- In [2009](#), **90.6% of children in Asian families** in California were U.S. citizens, as were **93.3% of children in Latino families**.<sup>18</sup>

*Immigrant workers, entrepreneurs, and taxpayers are integral to California’s economy.*

- Immigrants comprised **34.6% of the state’s workforce** in [2010](#) (or 6.5 million workers), according to the U.S. Census Bureau.<sup>19</sup>
- **“Immigrants comprise more than one third of the California labor force.** They figure prominently in key economic sectors such as agriculture, manufacturing and services. Immigrants provide leadership and labor for the expansion of California’s growing economic sectors—from telecommunications and information technology to health services and housing construction,” according to the [California Immigrant Policy Center](#).<sup>20</sup>
- Immigrants in California [pay](#) roughly **\$30 billion in federal taxes, \$5.2 billion in state income taxes, and \$4.6 billion in sales taxes** each year. In California, “the average immigrant-headed household contributes a net \$2,679 annually to Social Security, which is \$539 more than the average US-born household.”<sup>21</sup>
- Immigrants accounted for **34% of total economic output in the Los Angeles metropolitan area, 29% in the San Francisco metropolitan area, 25% in the Riverside metropolitan area, and 23% in the San Diego metropolitan area** in 2007, according to a study by the [Fiscal Policy Institute](#).<sup>22</sup>
- Unauthorized immigrants comprised **9.7% of the California’s workforce** in [2010](#) (or 1.9 million workers), according to a report by the Pew Hispanic Center.<sup>23</sup>
- If all unauthorized immigrants were removed from California, **the state would lose \$301.6 billion in economic activity, decrease total employment by 17.4%, and eliminate 3.6 million jobs**, according to a [study](#) by Dr. Raul Hinojosa-Ojeda and Marshall Fitz.<sup>24</sup> If unauthorized immigrants in California were legalized, it would add **633,000 jobs to the economy, increase labor income by \$26.9 billion, and increase tax revenues by \$5.3 billion**.<sup>25</sup>

*Immigrant, Latino, and Asian entrepreneurs and consumers add hundreds of billions of dollars and a more than a million jobs to California’s economy.*

- **The 2010 purchasing power of California’s Latinos totaled \$265.2 billion**—an increase of 287% since 1990. **Asian buying power totaled \$171.7 billion**—an increase of 297.6% since 1990, according to the [Selig Center for Economic Growth](#) at the University of Georgia.<sup>26</sup>
- California’s 566,573 [Latino-owned](#) businesses had sales and receipts of **\$80.3 billion and employed 458,922 people** in 2007, the last year for which data is available.<sup>27</sup> The state’s 508,969 [Asian-owned](#) businesses had sales and receipts of **\$181.3 billion and employed**

**905,957 people.**<sup>28</sup> Together, **businesses owned by Latinos and Asians comprised [more than one-quarter](#) of all businesses in the state**, according to the U.S. Census Bureau's 2007 Survey of Business Owners.<sup>29</sup>

***Most native born Californians have experienced wage gains from immigration.***

- “During 1990–2004, **immigration induced a 4 percent real wage increase for the average native worker**,” according to a [2007 study](#) by economist Giovanni Peri of the University of California, Davis.<sup>30</sup>
- The [reason](#) for wage increases is that “**immigrant workers often serve as complements to native workers rather than as their direct competitors for jobs**, thereby increasing total economic output. Native workers benefit because they are able to specialize in more productive work.”<sup>31</sup>

***California's immigrants move up the socioeconomic ladder over time—learning English, buying homes, and escaping poverty.***

- A [study](#) by demographer Dowell Myers of the University of Southern California found that:<sup>32</sup>
  - The share of California's foreign-born Latinos who reported being proficient in English as of 2000 rose from 33.4% of those who had been in the United States for less than 10 years to 73.5% among those who had been here for 30 years or longer.
  - The share of **foreign-born Latinos in California who owned their own homes as of 2005 rose** from 16.4% of those who had been in the United States for less than 10 years to 64.6% among those who had lived here for 30 years or more.
  - The share of California's **foreign-born Latinos who lived below the poverty line as of 2005 dropped** from 28.7% of those who had been in the United States for less than 10 years to 11.8% among those who had been here for 30 years or more.
- The **share of immigrants** in Los Angeles County who **owned their own homes** as of 2005-2006 **rose from 14.8%** of those who had come to the United States within the previous 10 years to 63.4% of those who had lived here for more than 30 years—compared to a homeownership rate of 54.2% among the native-born, according to a [study](#) by Manuel Pastor and Rhonda Ortiz at the University of Southern California.<sup>33</sup>

***Unauthorized immigrants pay taxes.***

- Unauthorized immigrants in California paid **\$2.7 billion** in state and local taxes in [2010](#), according to data from the Institute for Taxation and Economic Policy,<sup>34</sup> which includes:
  - \$176.9 million in state income taxes.
  - \$735.8 million in property taxes.
  - \$1.8 billion in sales taxes.

### ***Immigrants are integral to California's economy as students.***

- California's 94,279 **foreign students contributed \$2.8 billion** to the state's economy in tuition, fees, and living expenses for the 2009-2010 academic year, according to [NAFSA: Association of International Educators](#).<sup>35</sup>

### ***Naturalized citizens excel educationally.***

- In California, **32.1% of foreign-born persons** who were naturalized U.S. citizens in [2009](#) **had a bachelor's or higher degree**, compared to 17.5% of noncitizens. At the same time, only 25% of naturalized citizens lacked a high-school diploma, compared to 49.2% of noncitizens.<sup>36</sup>
- The number of immigrants in California with a college degree **increased by 42.8%** between 2000 and 2009, according to [data](#) from the Migration Policy Institute.<sup>37</sup>
- In California, **81% of children with immigrant parents** were considered "English proficient" as of [2009](#), according to data from the Urban Institute.<sup>38</sup>
- The English proficiency rate among **Asian children in California was 86.4%**, while for **Latino children it was 83%**, as of [2009](#).<sup>39</sup>
