**NEW AMERICANS IN MINNESOTA:
The Political and Economic Power of Immigrants, Latinos, and Asians
in the North Star State**

Immigrants, Latinos, and Asians account for large and growing shares of the economy and population in Minnesota. Immigrants (the foreign-born) make up 7.1% of the state's population, and 44.7% of them are naturalized U.S. citizens who are eligible to vote. "New Americans"—immigrants and the children of immigrants—account for 4.3% of all registered voters in the state. Immigrants are not only integral to the state's economy as workers, but also account for tens of million of dollars in tax revenue and consumer purchasing power. Moreover, Latinos and Asians (both foreign-born and native-born) wield \$11 billion in consumer purchasing power, and the businesses they own had sales and receipts of \$4 billion and employed more than 22,000 people at last count. At a time of economic recession, Minnesota can ill-afford to alienate such a critical component of its labor force, tax base, and business community.

Immigrants and their children are growing shares of Minnesota's population and electorate.
